Summary

Software and Full-Stack Web Developer skilled in C, C++, Java, JavaScript, React.js, Node.js, Express.js, and MongoDB. Experienced in OOP, DSA, and AWS cloud services, with a focus on building scalable, user-friendly, and impactful applications.

Skills

Programming & Querying: SQL, Python, C, C++, Java, JavaScript

Frameworks & Libraries: HTML, CSS, Bootstrap, Tailwind CSS, React.js, Node.js, Express.js, MongoDB, MySQL

Version Control & Cloud: Git, AWS

Experience

Web Development Intern

August 2024 – October 2024

(Remote)

Tools Used: HTML, Tailwind CSS, React.js, JavaScript, Node.js, MongoDB

- Built and deployed responsive web pages using React.js and Tailwind CSS, improving UI performance and user experience across multiple modules.
- Designed and integrated RESTful APIs with Node.js and Express.js, enabling smooth data flow between frontend and backend.
- Worked with MongoDB for database management — standardized schemas and optimized queries to improve data retrieval speed by 25%.
- Collaborated with a team of 3 developers to develop and test full-stack features, ensuring project delivery within deadlines.
- Used Git/GitHub for version control and teamwork, managing branches and resolving merge conflicts to maintain code stability.

Projects

Job Listening Portal | Web Development

August 2024 – September 2024

- Developed a full-stack job portal using React.js, Node.js, Express.js, and MongoDB, supporting role-based authentication for recruiters and job seekers..
- Implemented job search filters and recruiter dashboard, enabling easy job posting and management across multiple categories. a responsive UI with Tailwind CSS, improving user accessibility across desktop and mobile platforms.
- Tested application with 10+ dummy users, validating authentication flows and search functionality for real-world usage.

Number Gueshing Game | C++

1 February 2025 – 10 February 2025

- Developed a console-based interactive game in C++ where players guess a randomly generated number within limited attempts.
- Applied core programming concepts: loops, conditionals, functions, and random number generation.
- Added input validation, scoring logic, and replay functionality, enhancing engagement and usability.
- Provided real-time feedback (higher/lower hints), improving user interaction and gameplay flow.

Awards & Certifications

- * **AWS(DevOps) completion Certificate – GrossTeck (2025):** Completed AWS DevOps training with 8+ hands-on case studies on cloud deployment, automation, and CI/CD pipelines.
- * **Certificate of partition – Teck-Xplore 2024:** Awarded Certificate of Participation at Tech-Xplore for presenting an innovative technical project, showcasing technical skills and communication abilities.
- * **Hackthone certificate of partition – Adobe 2025:**Participated in Adobe Hackathon, awarded a Certificate of Participation for innovative problem-solving and coding skills.

Education

BTech . Computer Science

Babu Banarasi Das University

Graduated: 2026

CGPA: 8.2 / 10
